INTRODUCTION

The ITZ token is a meme token that is a community base token that aims to lay the foundation for a decentralized digital content ecosystem that empowers all members, including creators, consumers, and advertisers, to earn fair compensation for their contributions. ITZ also intends to establish itself as the future of digital content, accepting all types of content DApps. Social media provides every user with a platform dedicated to promoting their individual view of the world. The current content ecosystem is run by centralized platforms that rely on advertising for revenue. Therefore, content creators are under pressure to create content approved by advertisers rather than following their creative ideas and expressing themselves freely. The constraints inherent in ad-driven content platforms raise the question of how much freedom of expression is actually acceptable. Are these individual influential world views being exchanged for carefully crafted sponsored content for the masses? Furthermore, when looking at the end result, it is important to ask the question of where is most of the money going? In the current content system, corporate platforms reap the lion's share of the rewards from advertising dollars, and pay only a small amount of money to the influencers whose content the platform relies on. These tech giants lure content creators with promises of viable income while exploiting their creations for their own benefit. In this model, creators and users lose out while tech platforms thrive at their expense. ITZ, we believe that all members of the content ecosystem should benefit from their contributions. Using tokenization enabled by blockchain technology, ITZ aims to realize the dream of a more fair and democratic content environment. Content creation, curation, distribution, storage, and verification are all rewarded in ITZ tokens, the unique crypto currency that powers the ITZ ecosystem.

MISSION

To try on unlocking ITZ Token potential and making ITZ Token easy to use.

To make ITZ Token market place with global reach. People can easily get i it simply and easily.

To provide attention to the financial profits and safety of every single stakeholder.

To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

VISION

To create a global ITZ Token marketplace where buyers and sellers can buy, sell and trade ITZ Token in most secured and trusted manner.

To solve current problems of customers in a manner that make their business easier.

ITZ TOKEN WHITE PAPER

CORE VALUES Our main goal is to create happiness in other lives. Be Charitable

We strive to

be as giving as we can possibly be, helping out our community as much as we can. Be Sustainable We make decisions that are based on our long term health, not the short term gain. Be Transparent We strive to be open and honest with our community at all times for the benefit of all.

ECOSYSTEM

ITZ Token aims to bring innovation and novelty to the gaming, defi, utilities, NFT, sports, forex and crypto trading sector through Blockchain technology. The ecosystem of ITZ Token is very vast and broader as it is embedded with ITZ that makes it more essential for the people associated with the trading and education of crypto currency sector.

ANONYMOUS TRANSACTION

Transactions on the ITZ network are anonymous, but only on the network itself. The act of purchasing ITZ and the requirement of using an exchange means that you will have to prove your identity to purchase ITZ Token in the first place. Transaction scan, however, be carried out an ominously once on the network. On the other hand, it should be noted that all Blockchain keep a record of all transactions that take place on the chain. As a result, no transaction can ever be truly anonymous.

SAFE

ITZ Token has a solid reputation in the crypto currency world. The amount of money spent by the company on security and the personnel it has hired demonstrates this. As with other crypto- currencies, because it is a decentralized network, the individual bears a significant responsibility for safeguarding their Token. In terms of the network as a whole, there has yet to be a security breach.

PROOF OF STAKE

Seeing as crypto currencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method (PoS). Proof of stake is a consensus mechanism for crypto currencies. By staking their coins, crypto currency owners can check new transactions and add them to the Block chain. This method replaces proof of work, the first crypto currency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for crypto currency investors. These are some examples of crypto currencies that use it. Owners of a crypto currency can stake coins and create their own validator nodes using the proof-of-stake model. Staking is the act of pledging your coins to be used for transaction verification. They are locked while you stake your coins, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-of-stake protocol for the crypto currency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive crypto currency as a reward for their efforts. If a validator proposes adding a block with incorrect information, they will be penalized by losing some of their staked holdings.

WHY ITZ TOKEN?

Zero Human Factor: The human factor is not taken into consideration. The ITZ token is a meme token that is a community base token that. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.

Decentralization: Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.

Instant Transactions: Profits earned by other members are transferred directly into your personal wallet. There is no hoarding in the system, and all of your earnings are yours to keep.

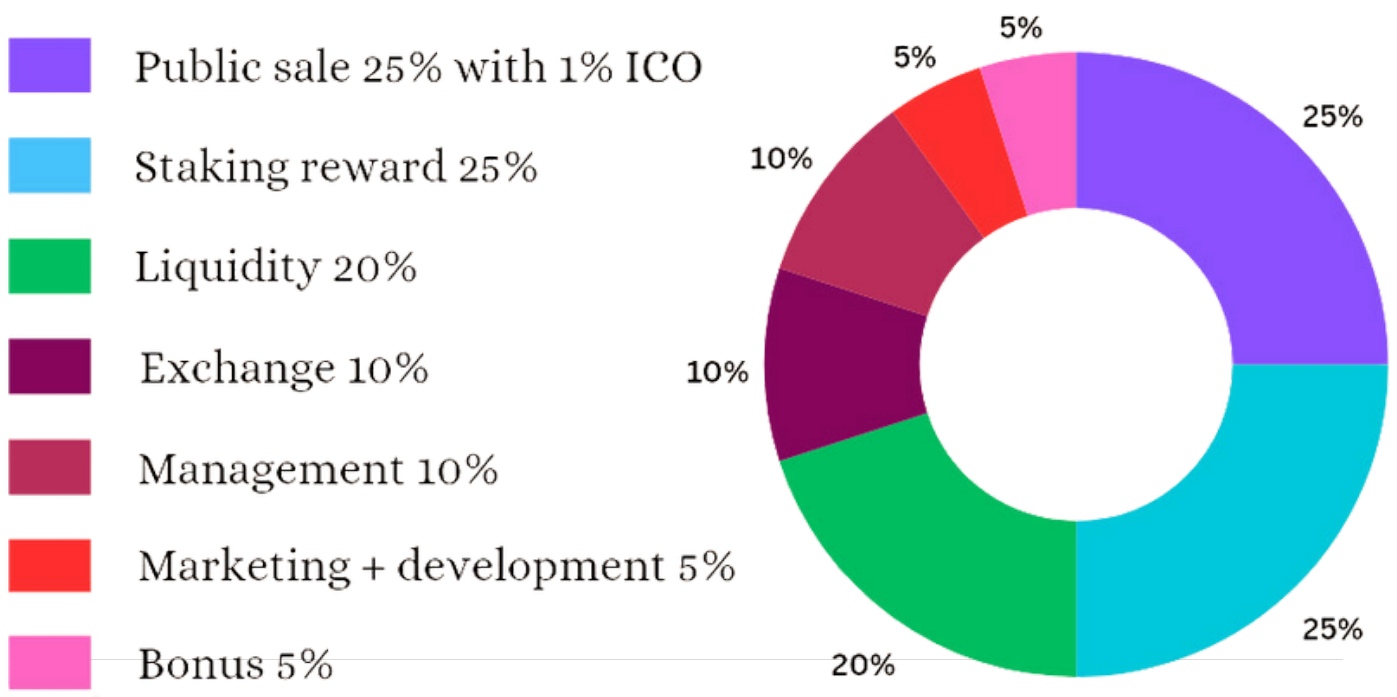

Anonymity: Because the smart contract code is public, anyone can view the complete history of all transactions. This ensures that the conditions are pure and that the platform statistics are accurate. **BONUS** You can earn money in ITZ

Token by opening new accounts with certain financial institutions and participating in the digital Coin- based economy supported by bonuses. These bonuses will not end here; instead, you will be able to earn from various other offers based on your investment and profit.

TOKENOMICS

- Name** : **ITZ Token**
- Short Name** : **ITZ**
- Maximum Supply:** **1,000,000,000**
- Technology** : **BEP-20**

TOKENOMIC

ROADMAP

STAGE 1

STAGE 2

ITZ Token ICO Launch

STAGE 3

ITZ Token Multiple Dex Listing

STAGE 4

NFT marketplace

STAGE 5

ITZ Wallet Launch

STAGE 6

Game Hub Launch Supporting All Game AI Projects and Hardware Wallet

STAGE 7

Blockchain Launch

WHAT IS “DECENTRALIZATION” DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum – anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize.

- » A global, open alternative to the current financial system.
- » Products that let you borrow, save, invest, trade, and more.
- » Based on open-source technology that any one can program.

SMART CONTRACT

Decentralized Finance or DeFi has emerged as the next- big-thinning the world. It has the potential to deliver better results to every single if implemented correctly. In a very short duration, this technology has shown strong prospects and already delivered some very impressive results to different industries.

ITZ TOKEN PARTNER– AIRDROP'S

ITZ Token project is a that focuses on making reward points a commonly used as digital currency by improving the current reward points system in India, through Blockchain technology and tokenization. Although the reward points system is efficient in its current form, corporations have risks, a lack of transparency and security concerns with their centralized system for issuing and operating reward points.

ITZ TOKEN AIRDROP GOALS:

- » A fair, equal opportunity for many different people to get involved
- » Facilitate activity and capture a wider audience Airdrop recipients do not need to do anything to receive the ITZ Token Ignore any requests for your private key.

SUPPORTING WALLET

Crypto Wallets are very similar to our mobile wallets where we store our money and do transactions from that. While in Crypto wallet we hold bit coins and other crypto currencies. A Crypto wallet is a software application that allows you to store and keep track of your Bit coins. A Crypto wallet differs from a traditional wallet in that it holds Crypto private keys

METAMASK

TP TOKEN POCKET

METHODS OF PAYMENT

This is a list of some of the top crypto currency gateways available in the market that accept Bit coin and altcoins as payment. Apart from Bitcoin payment processing, some of the major currencies that these crypto payment processors can help merchants accept include Ethereum, Ripple, Litecoin, etc.

ITZ TOKEN

USDT(BEP-20)

ITZ TOKEN NETWORK

ITZ Network is already spread across many countries because the team working on ITZ Token is already doing crypto currency work in many countries. Interest in crypto currency is growing, and fast. With some pretty major brands, marketplaces and payment processors announcing their adoption of crypto, this digital payment method is firmly on the radars of retailers across the globe. Whilst not every one thinks the world is ready for crypto currency payments, it's certainly getting harder to ignore the impact that crypto and the Blockchain technology on which it's built could have on ecommerce. Whether you're an ecommerce merchant just dipping your toes in to the crypto currency waters, or you're sold on the idea of crypto payments and are exploring how to accept them in your online store.

ITZ ECOSYSTEM OVER VIEW

The ITZ ecosystem is a comprehensive suite of blockchain-based services. This ecosystem aims to provide a wide range of solutions to cryptocurrency users, including trading, payments, blockchain exploration, and more.

ITZ TOKEN IN ONLINE GAME

ITZ Token Gaming is an online gaming platform Crypto games are video games that run on a crypto currency network and include a completely or partially distributed ledger architecture, providing players verifiable ownership over the virtual products contained in the games. Online gaming, in particular, has become a breeding ground for exciting innovation in this space. Developers are inventing new methods to leverage crypto to purchase and trade in-game products, cosmetics, unlock characters, and much more. The convergence of the virtual and there al—our metaverse —has never looked so good.

ITZ WALLET

ITZ Walle will be available soon ITZ wallet secure digital wallet will be designed for storing, sending, and receiving ITZ. It may come in various forms:

- » **Software Wallet:** A mobile app or desktop application for easy access to ITZ.
- » **Hardware Wallet:** A physical device for enhanced security and offline storage.

OUR TEAM The safety issue is very crucial in every field and can affect the condition of

a business and its performance. The companies need to take steps to ensure safety around their files and the account of the employees working with important clients. To make sure that everyone gets the best services for getting safety in their work environment and personal level, ITZ Token is planning on hiring professional people who know everything related to the safety concerns that ITZ arise in the business world. With the help of professional people, users can get the solution to their problems very easily and do not have to worry about their data. The data includes the work that has been done by the company or the employees which contains the details of the clients. It can be misused if it gets in the wrong hands which affects the reputation of the company.

It is a safe, speedy and mobile-based, digital and decentralized solution in the palms of your hands. This solution is capable of ensuring hassle-free access to your accounts. All in all, it is a true medium of decentralized payments. The main thing users will get is a global and competitive money transfer system. This system will have the ability to help exchange FIAT currencies as well as Crypto currencies and vice versa. ITZ Token is a crypto currency that will reward users for making payments in all walks of life. It has everything required to eliminate barriers in the way of worldwide adoption of crypto currency usage. Finally, in simple words, everything said in this whitepaper makes ITZ Token a safe and reliable decentralized currency and financial ecosystem ready for launch worldwide.
